**1. SIGNING OF THE PREVIOUS 200-UP-2 MEETING MINUTES:**

Minutes from the previous meeting were not available. The October 1994 meeting was canceled.

**2. ACTION ITEM UPDATE (see Attachment #4):**

No open action items

**3. NEW ACTION ITEMS (initiated November 17, 1994):**

No new action items

**4. INFORMATION ITEMS:**

- 200-UP-2 LFI - Michael Galgoul provided status (Attachment #5) and indicated that the Field summary reports (Geoscience, Air, Biota Sampling Reports) were released 30 September; these are the foundation of the LFI report. Beth Ward is the Unit Manager. QRA data tables provide risk calculations using an industrial scenario. We are looking for risk drivers over the next 5-10 years that require interim actions. 200-UP-2 is focused only on interim measures. FFS will look at IRM alternatives only and will not be a full blown FS. Paul Beaver requested that NRC classifications be used since it is an ARAR. Michael Galgoul noted that a barrier is a possibility for this unit.
- 216-U-12 Crib RCRA/CERCLA Coordination - BHI has refined Road Map; RL will be reviewing that with the regulators. (discharge ceased in 1987 or 1988 and shifted to U-17 crib which also receives UO3 waste).
- 216-U-8 Crib Area Interim Stabilization - Area of soil placement and revegetation is complete south of U-Plant. Entire area is posted for surface contamination. KEH will complete a resurvey and issue a report.
